Corporate Profile

Braintech's software products offer robust, scalable and transferable Vision Guided Robotic (VGR) solutions used for Industrial, Government and Defense, and Consumer and Service applications. The company's software is being utilized every day with over 470 installations and 125 different solutions around the world.

Braintech (OTC BB: BRHI) has been a publicly traded company since 1994. In 2008, Braintech acquired both SHAFI Inc. and SHAFI Innovation Inc. to gain established commercial relationships and to accelerate the company's growth and expansion in multiple markets. Braintech also maintains partnerships with ABB, Microsoft BAE, Carnegie Mellon and the Robotic Technology Consortium of the US Department of Defense. The company has offices in Michigan, Washington D.C., and Vancouver, Canada.

Why Invest in Braintech?

Braintech is an established leader in the field of intelligent vision with recent highs in gross margins and operating cash flow positives.

With new operating companies attached to new market focuses, new technologies and additional patents, and new leadership using new economics, the company is situated for a positive future.

F500 Customers

F500 companies using Braintech technologies include: Toyota, Ford, GM, Chrysler, Honda, Nissan, Harley-Davidson, Battelle, Boeing and Johnson&Johnson.

MARKETS AND APPLICATIONS

Industrial

Braintech provides a vision guided robotic software platform for industrial applications for the automotive, general manufacturing, materials handling and inspection markets.

Applications include:

- Random Bin Picking
- Inventory Organization and Management
- Moving-line Part Tracking and Handling
- Palletizing and De-palletizing
- Racking and De-racking

Consumer & Service

Braintech addresses a vision market need for hobbyists, educators and home appliance manufactures, by adding advanced vision technology to Microsoft Robotics Studio.

Applications Include:

- Edutainment
- Toys
- Healthcare (home health aid)
- Facility Maintenance
- Facility Surveillance and Security

Government & Defense

Braintech's experience with mission critical industrial vision technology and its dedicated research and development group, with over 151 years of expertise, ideally positions the company to develop additional government and defense applications.

Applications include:

- Logistics & Hazardous Material Handling
- Explosive Ordinance Disposal (EOD)
- Combat Vehicle Situational Awareness & Surveillance
